

MARCH 4-9, 2020

ORLANDO, FL

Candy Tefertiller, PT, DPT, PhD, NCS

Director of Physical Therapy

Craig Hospital

Denver, CO

Daily Life of a Clinician

- Patients/Families → Consumers
 - Internet Savvy
 - Increased Expectations

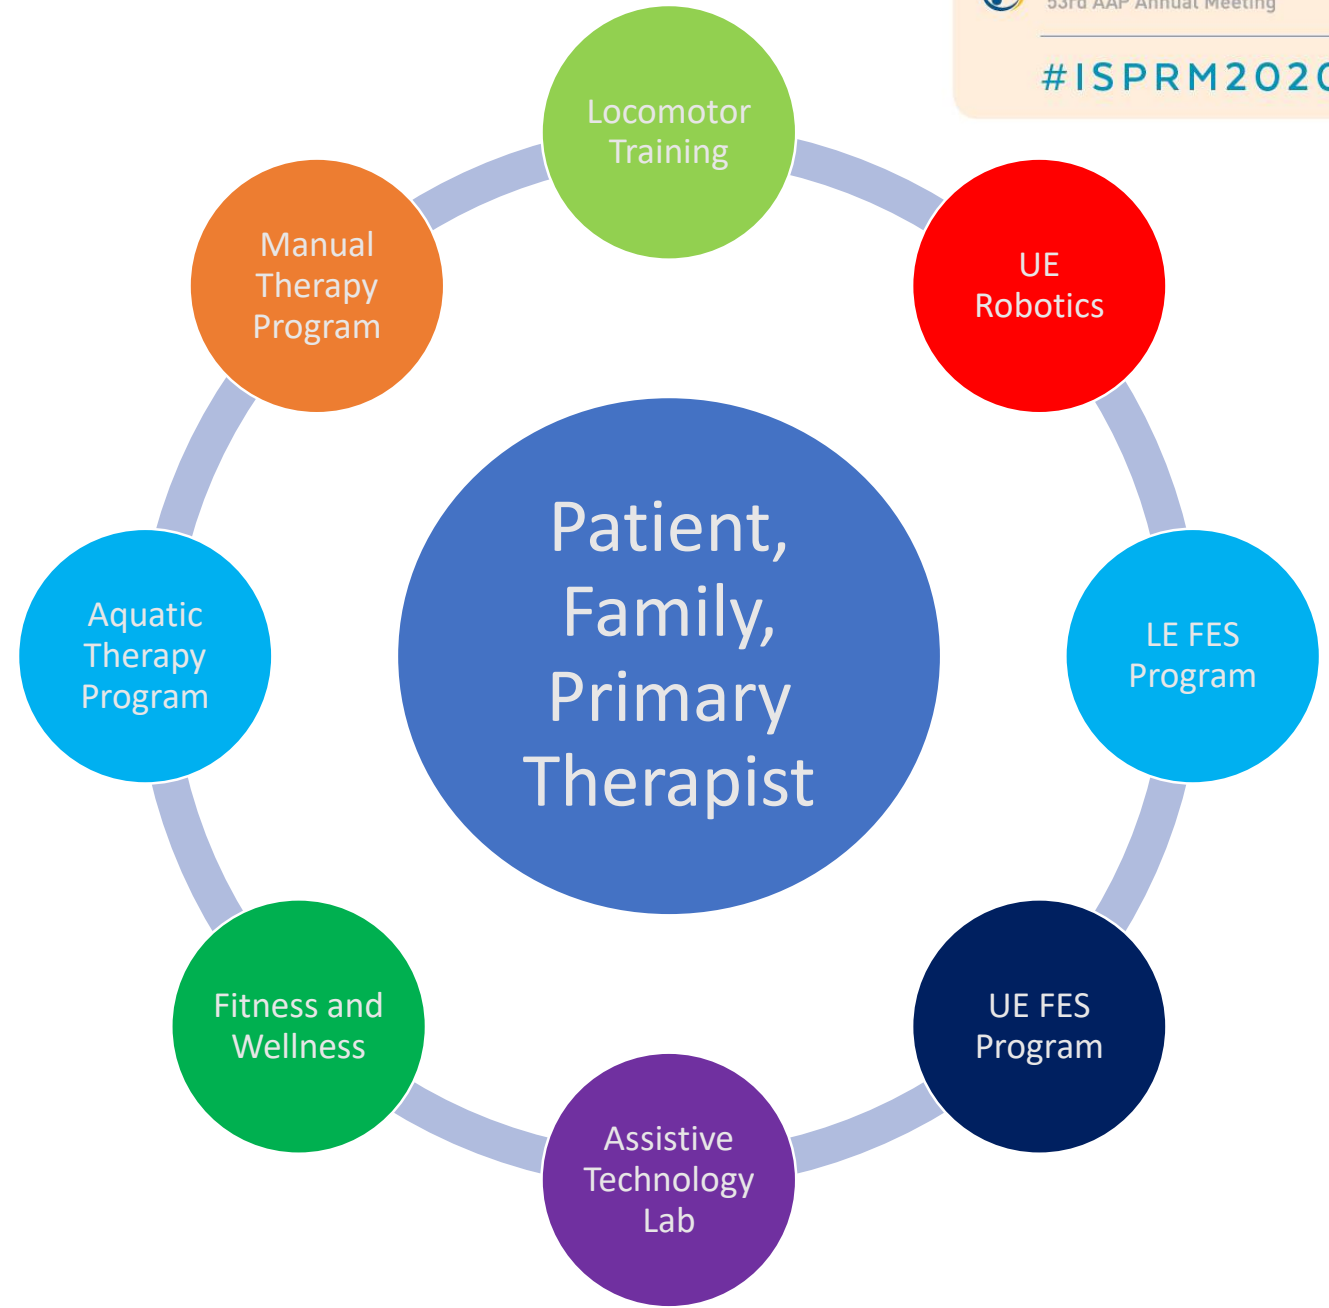

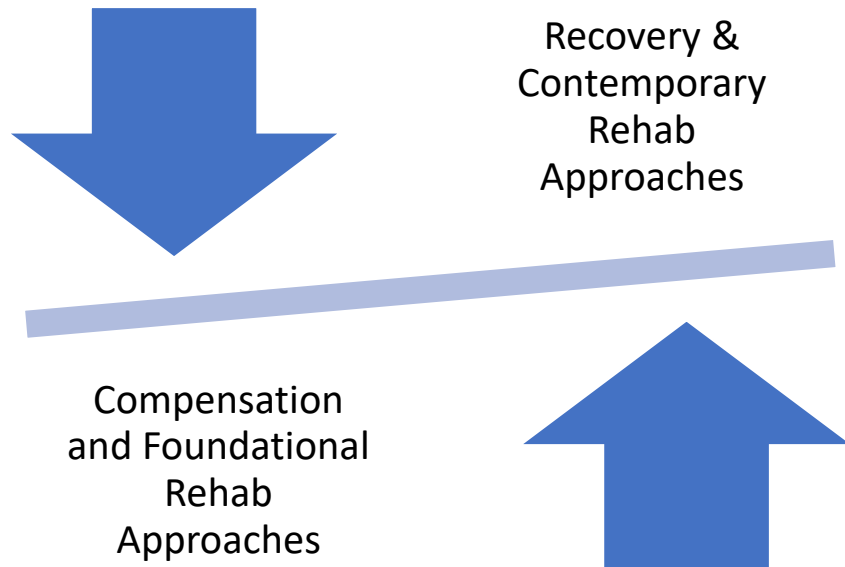

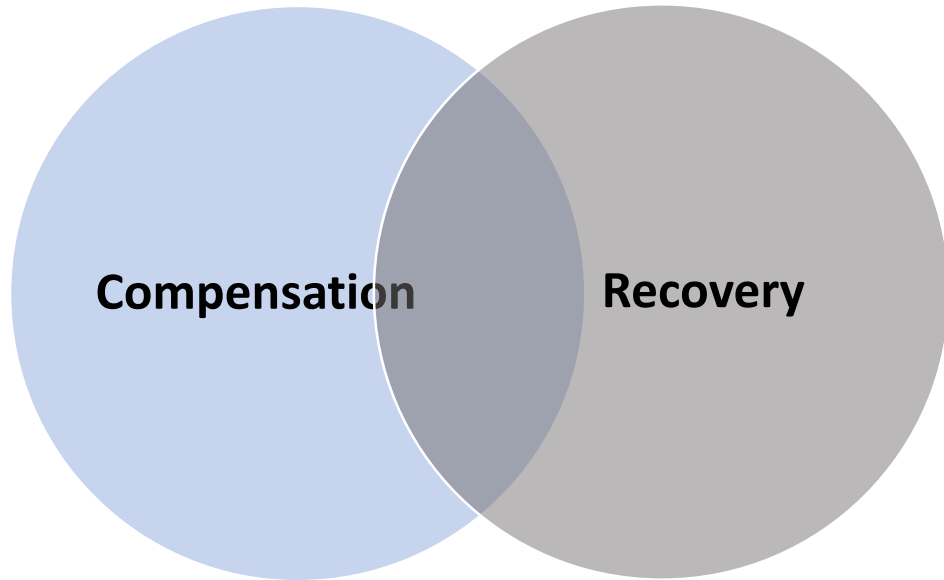

- 100% of prospective patients with SCI ask about technology opportunities before deciding to come to Craig
- 85% of patients with TBI ask about rehab technology.
- Demand for access to rehab technologies continues to increase
- Patient Values and Preferences include technology as a priority.

Lengths of stay

Lengths of stay in the hospital acute care unit have declined from 24 days in the 1970s to 11 days currently. Rehabilitation lengths of stay have also declined from 98 days in the 1970s to 35 days currently.

Patient Satisfaction and Compliance (Kluding, 2013)

- Greater satisfaction and adherence with neuroprosthesis group (Bioness L300) compared with standard AFO.

Considerations for Preparing/Supporting Clinicians
